

HAVOCH330

330W LED Moving Head Hybrid

USER MANUAL

For your safety, please read this user manual carefully before use.

Event Lighting reserves the right to revise the manual at any time. Information and specifications within this manual are subject to change without notice. Event Lighting assumes no liability or responsibility for any errors or omissions. Please consult Event Lighting for any clarification or information regarding this item.

Version 1.2 (September 2024)

1. Product Introduction:

1.1 Before unpack the fixture, pls make sure that the packing is in good condition, following items will be found in the box:

- The fixture
- This users guide
- 3m DMX cable
- 1.5m power cable with powercon
- Omega bracket for hanging installation
- Safety chain

1.2 Specification

Source

- Light source: Advanced 380w white led
- Led life: 60.000 hours
- Luminous Flux: 8790 lumen, 93000 lux@5m
- Control: Remote on/off via DMX
- Ballast: switching mode power supply

Optical System

- Beam angle: 4° to 48°

X/Y

- Pan: 540° (3.9 sec), Tilt: 265° (2.4 sec)
- 16-bit resolution
- Auto repositioning

Colors

- Linear CMY
- 9+open, interchangeable, indexable and bidirectional rainbow effect
- Color bounce

Gobos

- Outside \varnothing 20mm, inside \varnothing 16mm
- 8+open custom interchangeable position for rotating gobo wheel
- 13+open fixed gobos
- Real indexable and gobo shaking
- Distinctive gobo animation effect

Features

- DMX channels: 30
- Linear CMY
- Color wheel: 9 colors
- Fixed gobo wheel: 13+1 gobos
- Rotating gobo wheel: 8+1 gobos
- Motorized focus
- Full range 0-100% dimmer
- Various strobe
- Rotating 2 facets prism
- Frost
- Beam from 4° to 48°
- RDM function to change DMX address, display flip, X/Y Reverse and so on
- Software upgrade via DMX or USB
- Hibernation when lost DMX for preset time
- Indicate temperature info of base, led
- Fan speed auto change according to temperature

Display

- 2.4inch super nice LCD display
- Auto lock and flip

Power

- Max power consumption: 520W
- Powercon in , 3+5 pins DMX
- Power supply: Electronic auto-ranging
- Input voltage range: 100–240V, 50-60Hz

1.3 Description of the Device

1. Project lens
2. Head
3. Arm
4. Base
5. Display
6. Foot stand
7. Operation button
8. Handel

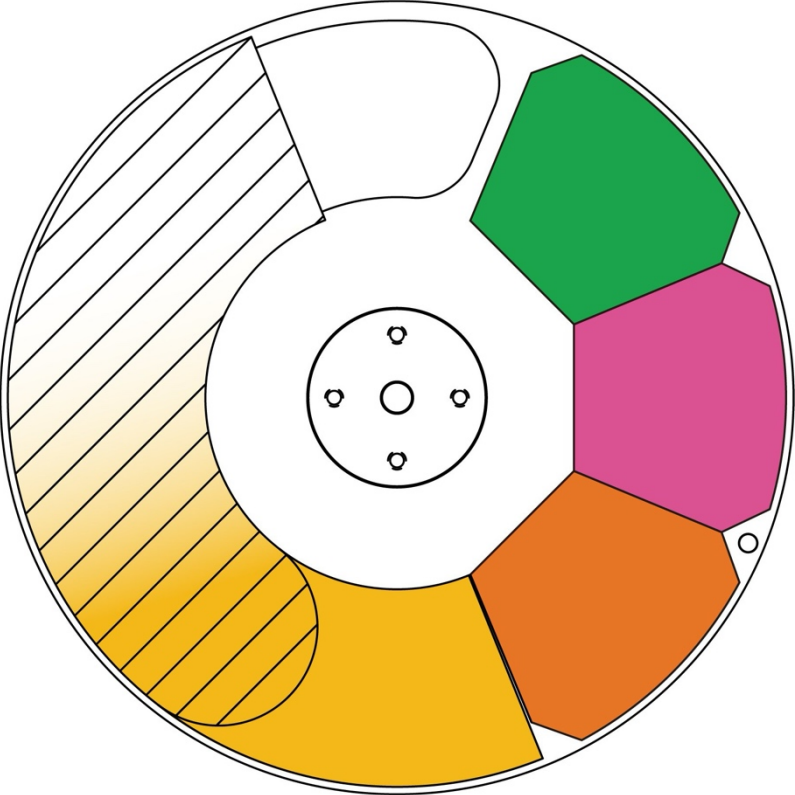

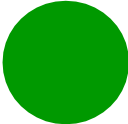

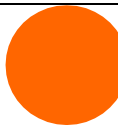

- 9. Wireless indicator
- 10. Ethernet
- 11. Battery indicator
- 12. Left button
- 13. Down button
- 14. Enter button
- 15. Up button
- 16. Right button
- 17. 5-pin DMX out
- 18. 3-pin DMX out
- 19. 5-pin DMX in
- 20. 3-pin DMX in
- 21. Fuse
- 22. USB
- 23. Power out
- 24. Power in

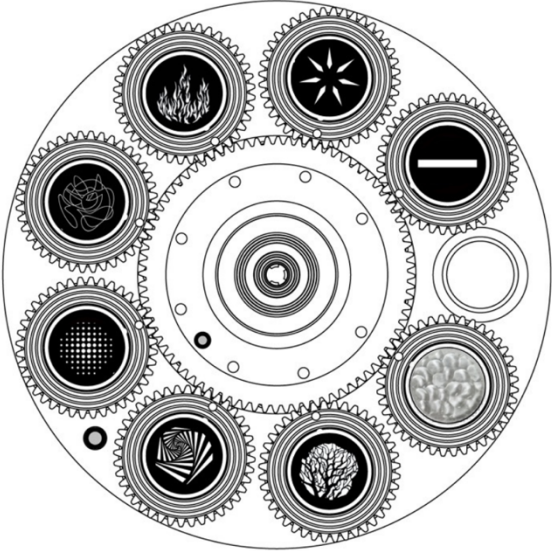

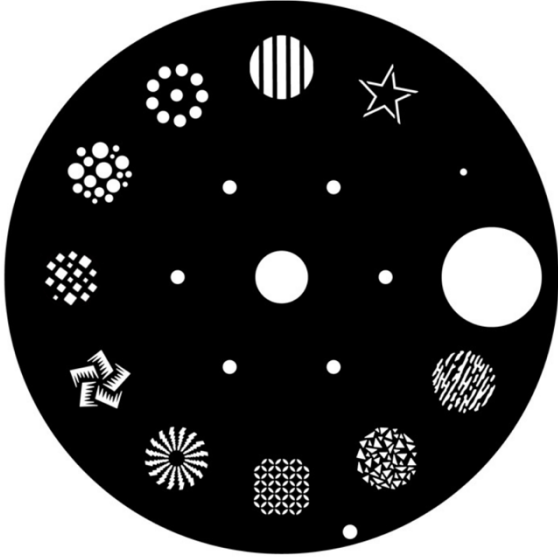

1.4 Colors and Gobos

2. Safety and maintenance Information

2.1 Safety Info

	Before operate this unit, please carefully read this users guide and keep if needed in future. It's necessary to respect following rules.
	The disposal of the device after lifecycle could damage the environment, need to take it to special company for recycling or return to authorized dealer.
	The products referred to in this manual conform to the European Community Directives and are therefore marked with CE logo.
	Keep this device away from children and unauthorized users, the manufacturer will not take responsibility for the damage due to any disregard of the information provided in this manual and wrong operation.
	Before operate the device, pls make sure the fixture is in good housing, ensure pan and tilt can rotate in its complete range.
	Pls make sure minimal 7m distance need to kept between the fixture to any flammable material.
	The device can only run with 100-240v voltage, 50/60Hz power, don't connect to any other wrong power. Disconnect the device from main power before open the shield or maintenance.
IP 65	For outdoor events.
	Never look directly into the projecting lens when the fixture is power on, the light may trigger epileptic seizures in photosensitive persons or persons with epilepsy. Especially at beam effect, extreme caution and observance of these safety instructions is mandatory.
	Don't put or install the device on a surface that subject to vibration or bumps.
Ta=45°C	The device is supposed to work in the temperate range -15°C to +45°C, do not use the device when the temperate exceed this range.
	The lens, shield need to be replaced when obviously broken, never use the device when the shield is not completed closed.
	Safety I class device, need to be earth connected.
	When the fixture is hanged overhead, the safety rope must be fixed to the bottom of the device to the appropriate fixing point.
	Always carry the device by the handles, do not take the head or arm directly for transportation.

2.2 Maintenance

2.2.1 Operation only allowed to qualified person, damages due to unprofessional operation or remove of any parts inside will not be considered in warranty service. There are no serviceable parts inside the device or package, service only leaves to authorized dealers.

2.2.3 Never allow the optical components contact with oil, fat or any other liquid.

2.2.4 A regular clearance of the device is needed for long-term usage, this is very helpful to maintain the lifetime and brightness need to use a soft and lint-free cloth to clean the optical system, fan and air flowing tunnel.

2.2.5. Trouble Shooting

Problems	Possible reasons	Checking or solutions
Device not power up	Powercon or power cable damaged Faulty power supply	Change a good power cable to try Replace new power supply
Pan/Tilt error or vibrate	Faulty Pan/Tilt PCB Faulty opto sensor Cable loosen	Replace PT013 PCB Replace opto sensor OP005 Check the cable connect to OP005
Lamp off	Temperature protection Fan not working Faulty Lamp Dimmer and strobe set at 0 Faulty power supply	Check the temperature from menu Check the fan speed info from menu Replace new Lamp Set dimmer and strobe channel at 255 Replace new power supply
Device not response to DMX	Faulty display PCB Wrong DMX addressing Faulty DMX cable	Replace new display PCB Check the address and setting Change to a good DMX cable

2.2.6 Replacement of the fuse

Need to replace with same type and rating, which originally installed in the device.

Step One: Unplug power cable from main power.

Step Two: Unscrew the fuse holder out of the housing with a screwdriver.

Step Three: Remove the broken fuse and replace with an exact same type of new fuse.

Step Four: Insert the fuse holder back to the housing and screw tight and reconnect power.

3. Installation

3.1 The device could be either put on a solid and even surface, or mounted upside down or sideways like left picture.

3.2 The mounting place must be sufficient stable and be able to support a weight of 10 times of the unit's weight. When the fixture is hanged, always additionally secure the device with the safety chain, fasten the safety rope at a suitable position so that the maximum fall of the projector will be 20 cm

3.3 How to do mounting installation.

Step one: Installation the clamp onto the

omega bracket;

Step two: Install the clamp and bracket on the bottom of panel, fasten the quick-locks;

Step three: Install the whole device onto appropriate truss and fasten the clamps, tight the safety rope with the truss or other fixing point at a suitable position that drop down distance not exceed 20 cm.

5. DMX connection and DMX protocol

5.1 DMX addressing:

5.1.1 The device is controlled by universal DMX 512 protocol, DMX address is the start channel used to receive instructions from the external controller. For independent control, each fixture must be assigned its unique address control channels. For example, this device has four channel modes: 30, if we set the mode at standard 30 channels mode, and there are several models need to be independently controlled, we just simply address first fixture at 1, and second fixture at 31, third one at 61, etc.

5.1.2 This device is equipped with 5-pins DMX in and out sockets only.

Pin1 =GND
Pin2=SIG(-)
Pin3=SIG(+)
Pin4=N.A.
Pin5=N.A.

5.1.3 The termination is prepared by soldering a 120Ω resistor between pins 2 and 3.

5.1.4 Connection: use DMX cable with 5 pin XLR-plugs to connect the controller with the fixture or one fixture with another.

5.2 Menu Tree

6. Unique Features

6.1 RDM, stand for “Remote Device Management”, with this function, users can realize remote control of the device, such as remotely changing DMX address, reverse pan/tilt setting, check a lot of useful information such as temperature, power consumption, fan speed. Etc. Every single device has a unique RDM code before left factory to distinguish from each other, usually not suggest users change this code freely.

6.2 Software upgrade function via DMX cable, if there is any new firmware for this device come out, it can be upgraded simply via a software upgrade box, no need to change any mechanical parts. The upgrade box is not included in the package, if need any further assistance pls just contact authorized dealers.

6.3 Hibernation, the device will enter sleeping mode if activated after a period of disconnecting DMX signal to save the power consumption, and will return immediately as soon as the DMX signal is sent again.

6.4 Display flip, by press up and down button for more than 3 seconds, the display will flip automatically, this function is useful to read menu conveniently when device is hanged.

7. Dimensions Drawing

8. Technical specification

Power supply	100-240 V AC , 50/60 Hz ~
Power consumption	556W
Lamp	Advanced 380w white led
DMX channels	30 channels
Beam angle	4° to 48 °
Luminous flux	93000 lux@5m
Fuse	T8A , 250 V
Device dimensions	415*340*632mm
Net Weight	21KG
Gross Weight	22.5KG
IP	20
