1. Safety information

Please read the instruction carefully which includes important information about the installation, usage and maintenance.

WARNING

Please keep this user manual for future reference. If you sell or transfer the unit to another user, ensure they receive the manual and understand the instructions.

Important:

Damage resulting from failure to follow this manual is not covered under warranty. The dealer is not liable for any defects or malfunctions caused by improper use.

Safety Precautions:

- Carefully unpack and inspect the device for transportation damage before use. If any damage is found, do not use the device—contact your local dealer or manufacturer immediately.
- **Do not** connect the device to a dimmer pack.
- Installation and operation must be performed by a qualified professional.
- The yellow/green conductor must be properly grounded to avoid electric shock.
- Always disconnect the power before servicing, cleaning, or when the device is not in use for an extended period.
- Keep the fixture out of reach of children.
- Use a safety cable when mounting the unit. Always carry the fixture by its base.
- Ensure the device is securely mounted to prevent vibration or accidental movement during operation.
- Install the device in a well-ventilated area, maintaining at least **50 cm clearance** from adjacent surfaces. Do not block ventilation slots, as overheating may occur.
- Verify that the device is connected to the correct voltage, as specified in the manual or on the product label.
- Operating temperature range: **-15°C to 45°C**. Do not operate the device outside this range.
- Before replacing any accessories, ensure the power is disconnected to prevent electric shock.

Operational Safety:

- Keep flammable materials away from the fixture during operation to prevent fire hazards.
- Ensure that the power cable is not crimped or damaged. If damaged, replace it immediately.
- The fixture's surface temperature may reach **up to 65°C** — do not touch the housing with bare hands during operation.
- Prevent flammable liquids, water, or metal from entering the unit. If this occurs, immediately disconnect the power.
- Do not operate the device in excessively dirty or dusty environments. Clean the fixture regularly.
- Avoid touching any internal wires while the fixture is operating, as this poses a risk of electric shock.
- Keep power cables separate from other wires to prevent entanglement.
- Maintain a minimum **5-meter distance** between the fixture and any objects.
- Avoid direct eye exposure to the light source while the fixture is in operation.
- If the housing or lenses become visibly damaged, they must be replaced with original manufacturer parts only.

Maintenance & Handling:

- Do not use the fixture if it becomes damaged. Do not attempt repairs yourself—unskilled repairs can cause further damage or malfunction. Contact an authorized service center for repairs.
- When transporting the device, use the original packaging and ensure **PAN/TILT locks are released before** packing.
- Avoid exposing the front lens of the fixture to direct sunlight or strong light sources during unpacking, installation, operation, or long periods of inactivity outdoors, as this can cause severe internal damage.
- After any contact with water, ensure the fixture is wiped down, dry and has been ventilated before storing.
- To ventilate the unit, run the fixture upright in a dry area for at least 15 minutes and up to 2 hours (depending on exposure to liquids). Ensure the release valve (Item 4 in section 2.3) is not covered so any water inside the unit can evaporate.
- If you notice any water inside the fixture (Behind the lens or the LCD display), do not open the fixture. Contact your purchasing agent and arrange repair.
- No parts in this unit are user serviceable. Do not open the fixture, if there is issues with this fixture please contact your purchasing agent for more advice. **Opening this fixture will void the warranty.**

2. Introduction

21. Package & Transportation :

Do not pack the device into carton or flight case before cooling completely, only 2 flight cases can be allowed to stack.

22. Dimensions (mm)

23. Overview:

1. Power In (True1)	6. DMX In (5-pin)
2. Power Out (True 1)	7. DMX Out (3-pin)
3. Valve	8. DMX In (3-pin)
4. Fuse	9. Ethernet Out
5. DMX Out (5-pin)	10. Ethernet In

11. Display

24. Accessories

Item	Qty	
Omega bracket	2	PCS
Safety cable	1	PCS
Signal cable	1	PCS
Power cable	1	PCS

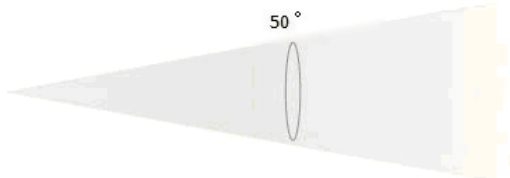

3. Technical Specification

3.1. Specification

AC POWER/ Frequency	100-264Vac; 50/60Hz	
Power Consumption	910W	
Light Source	800W LED Engine	
Colour Temperature	7000K	
Optical System	Zoom range: 4.5° - 50°	
	Standard Mode: Ra>70	
	HCRI Mode: Ra≥90	
	Frontal Lens: ø145mm	
Colour System	Linear CMY colour mixing	
	Linear CTO colour correction: 2,700K-7,000K	
	Colour wheel	5 colours + CRI
Gobo Wheels	Static Gobo	8 gobos + open
	Rotating Gobo	7 gobos + open
Animation Wheel	A graphic animation wheel with continuous rotation in both directions, used alone or in combination with gobos to create the splendid water wave effect, and can be changed into other wheels	
Prizm	2 combinable rotating and indexable prisms: 4-facet prism and 4-mirror, rotatable in both directions	
Frost	1 combinable medium frost filter	
Movement	PAN	540°
	TILT	260°
	Automatic PAN/TILT position correction	
Control, Interface, Programming	Display	4 touch button LCD control panel
	DMX Interface	3-PIN/5-PIN Waterproof XLR In / Out
	Power	True1 Waterproof In / Out
	Data	RJ45 In / Out
	DMX channels	23 / 32S / 32F / 42
	Protocols	DMX 512, RDM, Art -Net, sACN
Housing	IP Rated	IP65
	Dimensions	358.2 x 239.8 x 658mm
	Weight	29 Kg

32. LUX Chart:

600BSWF Small Angle				
Lux	121000	46100	18900	13200
				
Distance	5m	8m	10m	15m
Diameter	0.40m	0.64m	0.83m	1.25m

600BSWF Big Angle				
Lux	2250	804	504	266
				
Distance	5m	8m	10m	15m
Diameter	4.53m	7.35m	9.10m	13.5m

4. Operation

*Press [MENU] button to control menus.

*Press [^UP] and [vDOWN] button to navigate the menu structure.

*To select menu option or confirm the selection, press [ENTER]

*Return to upper level or without any change, press [MENU] button

*With battery inside, press one of buttons for 5 seconds to operate the menu if disconnect the power.

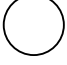

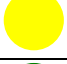

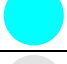

Note: The screen will be automatically locked if without any operation for a long time, and press [^UP], [vDOWN], [MENU] and [ENTER] button in sequence to unlock the screen.

7. Connecting Power & Data

6.1 Connecting Power

- Release PAN/TILT locks before connecting power.
- The fixture can be operated on 100 -260Vac, 50/60 Hz AC main power.
- The maximum power consumption is 910W.

The fixture must be grounded/earthed and able to be isolated from AC power. The AC power supply must incorporate a fuse or circuit breaker for fault protection. All wiring and connecting works must be handled by qualified electrician.

Power cables colour code as below:

Cable	Colour (US)	Cable	Colour (EU)	Symbol	Conductor
	Black		Brown	L	Live
	White		Blue	N	Neutral
	Green		Yellow/Green	 Or 	Ground(earth)

6.2 Connecting Data

The fixture is equipped with 3-PIN / 5-PIN XLR sockets for DMX IN/OUT. Normally 150 meters is workable for signal cable, and signal amplifier will be necessary if longer than this distance. Use a IP-rated XLR to connect the controller with the fixture or one fixture with another.

Building a serial DMX chain:

Connect the DMX data output from the controller to the fixture's data input socket. Connect the DMX output of the first fixture in the DMX chain with the DMX input of the next fixture. Always connect one output with the input of the next fixture until all fixtures are connected. Up to 32 fixtures can be connected to the same DMX link. Terminate the DMX out cable of the last fixture in the data link with a 120Ω DMX terminator.

8. Installation

8.1. General Instructions

This fixture is IP65-rated, making it suitable for both indoor and outdoor use. It is designed to be resistant to:

- **Dust** – Prevents dust from entering in amounts that could interfere with operation.
- **Water jets** – Protected against water sprayed from any direction.

Important Safety Notes:

1. Installation and operation must be performed by a qualified professional.
2. The fixture should be installed away from walkways, seating areas, and locations accessible to unauthorized personnel.
3. Never stand directly beneath the fixture during installation, removal, or servicing.

7.2 Installation Process

1. Check Equipment Integrity:

- Ensure that all clamps and safety cables are intact before installation.
- The truss or mounting structure must support at least six times the weight of the fixture without deformation.
- An additional safety cable is required and must support at least ten times the fixture's weight to prevent falling in case of clamp failure.
- Do not attach the safety cable to the bracket.

2. Mounting Options:

The fixture can be installed in three different positions:

- Hanging upside-down
- Mounted sideways on trussing
- Standing on the floor

Side Mounting

To maintain the IP65 rating integrity of the fixture, all cables must be towards the ground to prevent water accumulation around connectors.

Warning!

- DO install and operate by qualified operator. Fixture(s) should be installed in areas outside walking paths, seating areas, or away from areas where unauthorized personnel might reach the fixture by hand. NEVER stand directly below the fixture(s) when rigging, removing or servicing.
- Always ensure that the unit is firmly fixed to avoid vibration and slipping off during operation. Ensure that the trussing or area of installation must be able to hold 10 times the weight without any deformation. Always attach a safety cable that can hold at least 12 times the weight of the fixture whenever installing this fixture in a suspended environment to ensure that the fixture will not fall if the clamp fails.

9. Fixture cleaning

Regular cleaning is essential to maintain the fixture's performance and extend its lifespan. The buildup of dust, dirt, smoke particles, and fog fluid residues can reduce light output and impair cooling efficiency.

The required cleaning frequency depends on the operating environment. Factors that may necessitate more frequent cleaning include:

- Use of smoke or fog machines
- High airflow rates (e.g., near air conditioning vents)
- Airborne dust from stage effects, building structures, fittings, or outdoor environments

If any of these factors are present, inspect the fixture before operation and clean it as needed.

Cleaning Guidelines:

- Perform cleaning in a clean, dry, and well-lit area.
- Use only gentle pressure when cleaning optical components.
- For best results, use water with a mild detergent.
- Do not use alcohol, solvents, or abrasive materials, as they can damage optical components.
- Optical components are delicate and easily scratched—handle with care during cleaning.
